

panda pocket  
Instructions

# Tie

Centre the pocket facing out, over your abdomen.

Pull behind back and cross ends.

1

Pull ends up over shoulders, spreading fabric flat.

This ensures even distribution of weight.

2

Tuck both ends under the waistband, and pull snug.

3

Cross ends, and pull behind your back again.

This creates the seat for baby.

4

Tie securely at the back, or cross and tie at side or waist.

5

Pull crossed fabric away from body, and get ready to load baby!

6

# Load

7

Facing you, place baby's legs on either side of the crossed fabric.

8

Spread fabric under baby's bottom to keep it from bunching.

9

Tuck arms in.

10

Tuck both legs under the Panda Pocket waistband, and pull up, securing baby.

11

Voila! Baby is securely loaded. Try pulling waistband even higher, freeing baby's legs to kick.

12

The steps are the same for face-out position. Just load baby backwards!

*Pocket must be pulled up and facing out to ensure baby is secure.*

*Do not use as a blanket; Panda Pocket could tangle.*

*The safety of your child is your responsibility.*
